VILLAGE OF BURR RIDGE

BUILDING PERMIT APPLICATION CHECKLIST

DEMOLITION

At a minimum, the following must be submitted with the permit application for a REVIEW to be completed:

- **Owner Authorization Form:** Any authorized representative of the property owner may be the applicant. However, the property owner must provide written consent for another party (e.g. the contractor) to act as the permit applicant.
- **Plat of Survey or Site Plan:** A current survey or an engineering site plan showing all buildings and structures on the property, existing water and sewer lines, other utility service lines, and well and septic system (where applicable). The Burr Ridge Zoning Ordinance does not permit accessory structures to remain on a property without a residence. All such structures and buildings must be removed concurrent with the demolition of the principal building.
- **Water/Sewer Disconnect Application**
- **Contractor License Application:** All contractors performing permitted work in the Village must be licensed.

The following must be submitted prior to permit ISSUANCE but can be submitted at the time of initial application:

- **Fee:** $500 for residential structures; $1,000 for non-residential structures. Payment of any outstanding water bills will be required prior to permit issuance. Additional fees may be assessed depending on the nature and scope of the project.
- **Bond:** A refundable $10,000 cash performance bond is required. The bond will be refunded upon successfully completion of the project and approval of all required final inspections, including restoration of grade and ground cover. All disturbed areas must be re-graded and suitable ground cover (sod or turf grass from seed/blanket) established. Dumpsters, equipment, and all debris and materials must be removed from the site. Any pavement damage must be repaired with a full depth pavement patch, with the top 2" placed as hot-mix asphalt surface coarse mix.
- **Burr Ridge Water/Sewer:** Burr Ridge Public Works Department requires an inspection of the water/sewer service lines ***before*** a demolition permit is approved.
    - Contact the Burr Ridge Public Works Department at (630) 654-8181, opt. 7, to schedule an appointment to have the water meter removed and to inspect the service line(s) prior to removal.
    - If the same service lines are to be used for construction of a new residence, the end of the service lines should be located and marked with a 4x4 board. If the services lines are not going to be used again, they should be excavated at the corp stop/water main and sewer stub/sewer main location and disconnected as determined by the Water & Sewer Division. If this is the case, a second appointment may be needed to schedule the disconnection.
- **Other Sanitary Sewer:** Properties located in DuPage County are either located in the jurisdiction of the Flagg Creek Water Reclamation District (630) 323-3299 or the Du Page County Public Works Department (630) 407-6800. You must contact these agencies to schedule an inspection and provide documentation of their approval for the disconnect.
- **Well and Septic System**: If an older home is being demolished, there may be a well and/or septic system on the property. Depending on the location of the property, approval for the proper abandonment of these systems is required from the Du Page (630) 682-7400 or Cook (708) 836-8600 County Health Department. If you intend to maintain the use of the well for outdoor irrigation, approval from the County Health Department is still required.
- **Cook County Demolition Permit (Asbestos Removal):** For properties located in Cook County, approval must be obtained from the Cook County Environmental Control Bureau (312) 603-8200 for asbestos removal.

- **Illinois Environmental Protection Agency:** IEPA requirements to be met only when a single-family residence is being demolished for the purpose of subdivision development.

After permit issuance, but prior to demolition activity occurring:

- **J.U.L.I.E. Locate:** A J.U.L.I.E. locate must be performed and disconnection of all utilities, including but not limited to gas, electric, and water/sewer, must be completed. https://www.illinois1call.com/
- **Notice to Adjoining Properties:** The applicant shall submit an affidavit verifying that notice has been provided to all property owners within 250 feet of the property of the impending demolition work. The notice shall specify a period of one week or less in which the demolition will occur. The notice shall be delivered at least 7 days in advance of the demolition (not counting the day or week of demolition and not counting the day the notice is provided). If demolition does not occur during the time specified in the notice, a new notice shall be provided with a new affidavit submitted to the Building Official. See *Sample Notice and Affidavit for Demolition* form.
- **Site Prep Inspection:** Construction fencing must be installed, and a site prep inspection must be completed and approved. See *Site Preparation and Maintenance* form for additional details. Call (630) 654-8181 x. 3100 to schedule the inspection.
